REDEFINING SPORTS INFRASTRUCTURE

SOUTH ASIA'S LEADING SPORTS INFRASTRUCTURE ORGANISATION

www.greatsportsinfra.com

SMART SPORTS INFRASTRUCTURE

Great Sports Infra Limited (GSI) is South Asia's leading provider of turnkey solutions for sports infrastructure. Experts at GSI build state-of-the-art infrastructure and have executed some of the world-class projects like those at the M. Chinnaswamy Stadium, Bengaluru; Rajiv Gandhi Stadium, Mizoram; Transstadia, Ahmedabad; Salt Lake Stadium, Kolkata, to name a few. We have also developed sports infrastructure that hosted national and international level tournaments such as the 35th National Games, Military World Games, World Hockey League, and African Youth Games.

Our product portfolio spans across synthetic turf (FieldTurf, USA), hybrid turf system (Tarkett Sports, EU), suspended sports flooring (SnapSports, USA), turf protection system (Terraplas, UK), synthetic athletic tracks (Porplastic, Germany), modular gallery seating (Alcor, France), and subsurface aeration and drainage technology for golf, football & cricket (SubAir Systems, USA). These products have been designed and manufactured by the world-leaders of the sports product manufacturing industry and approved by international sports governing bodies such as FIFA, FIH, FIBA, ITF, IHF, IAAF, to name a few.

GSI, the one-stop-shop for sports infrastructure, delivers innovative and next-generation solutions. GSI has revolutionized the framework of sports infrastructure with multisport and multipurpose facilities that result in the end-customer satisfaction.

Developed about
12 million sft.
of Sports infrastructure

Installed in over
5,500
in 310 cities & towns
across **7 countries**

Over
14
years of large project
experience on
a turnkey basis

OUR PRODUCT PORTFOLIO:

MODULAR GALLERY SEATING

Alcor modular gallery is a revolutionary alternative to conventional concrete/steel stadium-galleries. It conforms to the highest European standards and is modular and portable in nature. The design, using an automated tool by Alcor, meets the most stringent safety standards & provides flexibility to configure as per the topography of the site and the preferred layout. ALCOR EQUIPEMENTS is an industry leader for modular grandstand seating. Be it modular spectator seating for a concert or a grandstand for a sports event, Alcor has its footprints across various industries across the globe.

Value Proposition:

- Less than half the cost of a conventional concrete/steel stadium
- Superior Design – An interlocking system without nuts & bolts ensuring fail-proof installation
- Extremely quick to assemble: 1,000 seats per day
- Earthquake resistant structural design, conforming to the EN standards
- High Durability – made with galvanized steel, they are designed to last for decades
- High Adaptability – can be relocated with ease and installed even in rugged areas
- Environment-friendly- made with 100% recyclable materials.

Certification/Accreditations/Standards: SOCOTEC, EN, NBC

Prominent installations: ~15,000 seating at Rajiv Gandhi Stadium, Mizoram; FIFA Beach Soccer World Cup venue; Le Mans venue; Roland Garros venue; UEFA Euro 2016 venue

Value Proposition:

- No cancellation of matches due to wet or soggy outfields
- Maintains lush green turf 365 days a year
- Deeper and stronger root system
- Automated system with in-field sensors
- Allows multipurpose use of the stadium

Prominent Installations: M. Chinnaswamy Stadium, Bengaluru; Wembley Stadium; 2014 FIFA World Cup Brazil stadiums; 2018 FIFA World Cup Russia stadiums; DLF golf course, Gurugram

SUBSURFACE AERATION AND DRAINAGE TECHNOLOGY

SubAir Systems designs and manufactures a patented two-way subsurface airflow system for sports field and golf courses. The SubAir system operates in a vacuum mode right from the time it starts to rain, so that rainwater is continuously drained out with massive power (draining up to 10,000 litres/min, drains 36X faster than gravity), and the field is ready to play within minutes of subsiding of rain.

GSI is the exclusive licensee for the SubAir in South Asia and for the cricket system worldwide. Chinnaswamy Stadium, Bengaluru, with our installation of the SubAir system, became the first cricket stadium in the world to adopt this technology.

SYNTHETIC TURF

FieldTurf is the world leader in next-generation artificial grass and has a patented unique three-layer infill system that replicates bio-mechanical properties of natural grass. Its success is reflected by its installations in thousands of stadiums and playgrounds across 55 countries. This product allows multiple sports like football, futsal, cricket, hockey, golf, volleyball, and badminton. It can also be used in school playgrounds and allows non-sports usages for events like concerts, parades, gatherings, etc.

To date, GSI has installed about 35 FIFA/ FIH standard fields across South Asia.

Value Proposition:

- All-weather playability (drains faster than it can rain)
- Virtually no maintenance!
- Multisport and multipurpose surface
- Fire-retardant
- Proven safety and durability
- Certified to meet the toughest standards

Certification/Accreditations/Standards: FIFA Preferred Producer, FIH Preferred Supplier, IRB Preferred Turf Producer, ITF

Prominent Installations: 35th National Games, Kerala; World Hockey League Finals venue; FIFA GOAL Projects – Sri Lanka, Bangladesh, Maldives; ISL & I-League venue; AIFF Elite Academy Training, Chowgule Sports Centre, Goa

Value Proposition:

- World class athletic surface designed with German technology
- Suitable for amateur to professional
- Environment-friendly and safe tracks (no Volatile Organic Compounds)
- High UV and weather-resistance
- Over 50 years of experience & hundreds of installations worldwide

Certification/Accreditations/Standards: DIN Standards, IAAF Class-I, IAAF Class-II

Prominent Installations: 35th National Games, Kerala; African Youth Games venue; Salt Lake Stadium, Kolkata; IIT Madras, Acharya Nagarjuna University

SYNTHETIC ATHLETIC TRACKS

Porplastic is the leader in providing world-class synthetic surfaces. For more than five decades, Porplastic PUR/Rubber granules systems have achieved an excellent track record as sporting surfaces used in synthetic tracks. It is also an optimum playing surface for professionals to perform on, during national or international level competitions and tournaments.

INTERLOCKING MODULAR SPORTS FLOORING

SnapSports is the originator of the outdoor backyard court industry and the world's leading manufacturer and supplier of premium modular sports flooring for residential and commercial applications. The company's multi-patent modular sports floors are top rated, high performance & safe play surfaces in the industry. It is portable, therefore unlike most other sports surfaces, it is not locked down like a sunken investment and can be used in multiple locations.

Value Proposition:

- Multi-sport and multi-purpose flooring which is also portable
- Patented ShockTower® Technology (acts like a cushion and reduces the impact on the joints and the limbs)
- Comes with a 16 years Limited Warranty
- Virtually no maintenance

Certification/Accreditations/Standards: ASTM, FIBA, ITF, IHF

Prominent Installations: At 35 islands of Maldives; NIT Warangal; Manipal University; J&K State Sports Council; Indian Air Force, Bengaluru

Value Proposition:

- #1 market leader in hybrid grass technology
- Pioneering hybrid pitch system since 1989
- Plays, looks and feels like natural grass
- Over 5.5 million square meters of GrassMaster & PlayMaster systems installed
- Systems for all sports with varying levels of performance

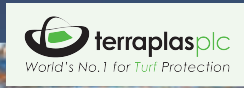

Prominent Installations: Camp Nou, Juventus Center and Stadium, Old Trafford, Anfield Stadium, over 16 Premier League Stadiums, 14 EFL Stadiums, 5 National grounds

HYBRID TURF

The water-retaining Desso fibre technology gives 100% true-to-nature playing experience. It helps in optimal shock absorption and is uniform over the whole pitch. While natural grass can be played on for an average of 250 hours per season, artificial grass is always playable. Regardless of the weather, Desso provides an all-weather playability condition all year round. 1 artificial turf pitch equals the capacity of 5 natural grass pitches, which implies that the carefully processed hybrid turf gives a significant return on investment which in turn allows budget and space savings for canteen, parking, etc. Last but not least; the artificial turf requires no watering, mowing or weed removal.

TURF PROTECTION SYSTEM

Terraplas is designed to protect the surface at stadiums when the playing area is being used for non-sporting events. Terraplas plc is "World's No.1 Turf Protection Company". In order to optimally utilize the idle stadiums for various revenue generation activities like opening and closing ceremonies, music concerts, political gatherings, trade shows, weddings, etc., Terraplas, the turf protection system, was designed. By offering turf protection, GSI is able to monetize the idle asset and large sunk investment of stadiums into significant revenues and profits.

Value Proposition:

- Hosts any event safely within the stadium (concerts, trade shows, gatherings, etc.) while protecting the playing surface
- Key facilitator for multi-use of stadiums, thus generating additional revenue streams
- Enables faster ROI and reduces dependency on sports competition income
- Suitable for artificial/natural turf stadiums and even synthetic tracks
- Keeps the grass healthy

Prominent Installations: Transstadia, Ahmedabad; Wembley Stadium; ANZ Stadium; Emirates Stadium; Ohio State University, about 95% of multipurpose National Stadiums in the world.

Value Proposition:

- One of the best quality products used at the highest level of world sports
- Trouble-free maintenance and long-lasting appeal

Prominent Installations: Olympics venues, NBA competition venues, thousands of installations globally.

MAPLE HARDWOOD FLOORS

Maple Hardwood Floors are the most preferred surface for indoor games and GSI provides every range from amateur to training to competition. The installations span across schools, universities, and stadiums which have conducted national and international championships on them. The expertise extends even to the renovation of old installations.

RETRACTABLE SEATING SOLUTIONS

Value Proposition:

- Over 30 years experience
- Suitable for both indoor and outdoor venues
- Fixed and mobile for sport and pool applications.

Certification/Accreditations/Standards: ISO, CE

Prominent Installations: College Sports Centre, Australia; Sports Centre, Macau; Military Base, NZ; NSW Sports Centre, Australia; International School, Hong Kong

The Glide Series is the latest step in the development of quiet, smooth running, retractable seating. Every part has been designed to enhance the operation of the system. The result is a seating system like no other. One that is quieter to operate, stronger in its design and more user-friendly for facility staff.

TESTIMONIALS

“

"I must express my appreciation of your Company's handling of the project in the most professional manner. The engineering skills and expertise utilized by you to achieve the results were remarkable. It has been a unique and good experience for us."

”

Mr. Umaji Chowgule
Chowgule Group, Goa

“

Fan experience is our primary objective. Additionally, there is a risk of Rs. 80-100 Crores (US\$12-15M) when a game gets washed out including losses to the paying public, the TV broadcasters and advertisers, in-stadia advertisers, etc. We believe we have addressed this challenge with the SubAir System.

”

Mr. Brijesh Patel
Former Secretary, Karnataka State Cricket Association

“

The entire project [Football Field] was executed professionally. Your technicians showed great expertise in designing and constructing the sub-base and then the installation of the FieldTurf itself with sophisticated equipment. We commend Great Sports Infra for a wonderful job and look forward to your continued support.

”

Shri Zodintluanga
The Hon'ble Minister for Sports & Youth Services, Government of Mizoram
