SMART SPORTS INFRASTRUCTURE

Great SportsTech Limited (GSL) is South Asia's leader in turnkey sports infrastructure using innovative technologies and products.

Our projects exceed global standards like **FIH, FIFA, World Athletics, FIBA etc.**, for competition venues (South Asian Games, National Games) yet, we also offer optimal solutions for recreation, amateur and training facilities.

Our exclusive association with global leaders enables our clients to benefit from the highest quality products backed by our award-winning execution services.

Over **20** years of
“**Design & Build**”
track record

Over **1,500**
projects in
310 cities & towns
across **8 countries**

OUR PRODUCT PORTFOLIO

SYNTHETIC TURF

FieldTurf is the pioneer and world leader in next-generation artificial grass. Made with the highest quality materials, FieldTurf offers more than a dozen varieties of highly engineered turfs that suit any grass-based sports. It has proven itself repeatedly in India and S Asia over the last 20 years.

It is widely popular not only in Stadiums but also in Schools, Corporate campuses, Academies, Pay & Play facilities etc. GSL has installed over 50 FIFA/FIH standard fields across South Asia.

Prominent installations:

35th National Games, Kerala. World Hockey League, Raipur. FIFA Goal projects - Sri Lanka, Bangladesh, Maldives. ISL & I-League venues etc.

Credentials:

FIFA Preferred Producer, FIH Preferred Supplier, IRB Preferred Turf Producer, ITF

Porplastic is the leader in providing World Athletic certified synthetic track surfaces including Full PUR - Full EPDM, Full PUR, Sandwich and Spray Coat systems. For more than five decades, Porplastic synthetic tracks have been successfully used in the best stadiums globally. These high quality products are without volatile organic compounds (Emission-Free).

SYNTHETIC ATHLETIC TRACKS

Credentials:

DIN Standards,
WORLD ATHLETICS (IAAF)
Class – I & Class – II

Prominent installations:

South Asian Federation Games, Nepal. 35th National Games, Kerala. African Youth Games, Mauritius. Salt Lake Stadium, Kolkata. IIT Madras. Sports Authority of India. Woxsen University.

MODULAR GRANDSTAND

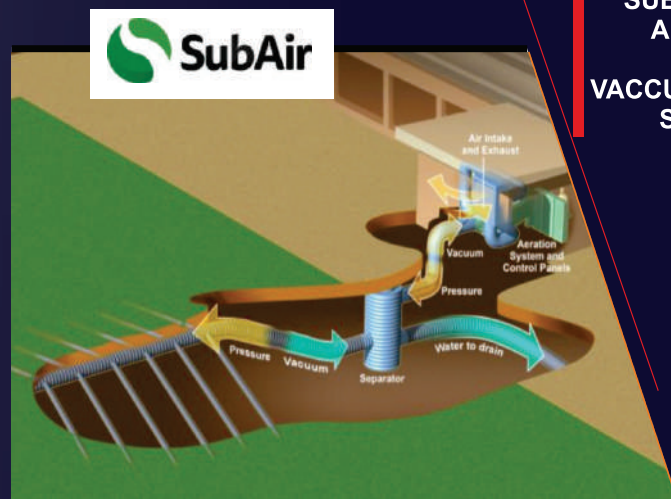

Modular stadium is a revolutionary alternative to conventional concrete stadium galleries - while meeting the most stringent safety standards. Alcor is an ideal solution for both permanent stadium seating or temporary (sports, concerts or other events).

Prominent installations:

15,000 seater capacity stadium in Mizoram. 16,500 seater capacity stadium in Nepal. 500 seater capacity for Indian Navy, UEFA Euro 2016 etc.

SubAir Sport is a cutting-edge technology for natural or Hybrid grass Cricket / Football fields, Golf etc. In the aeration mode, it provides fresh air to the root zone, thereby being an excellent agronomic tool all-round the year enabling lush green turf. When there's heavy rain, it automatically converts to a vacuum mode to drain out rainwater 36 times faster than gravity, making the field ready for play within minutes! It also enables the turf to "breathe" when the surface is covered for any non-sports events.

SUB-SURFACE AERATION & VACCUM POWERED SUCTION

Prominent installations:

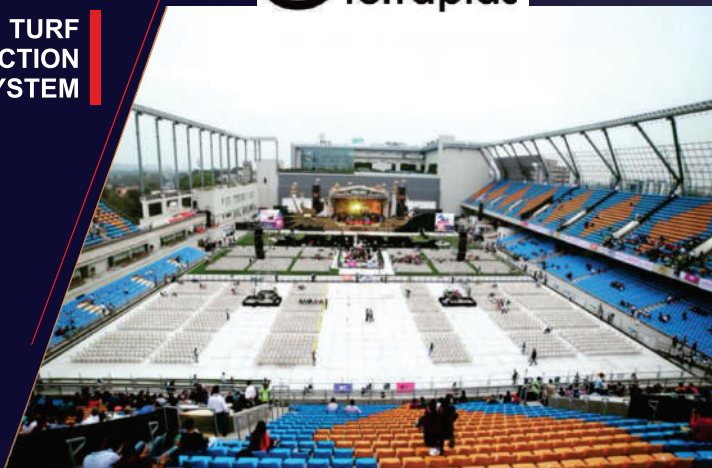

M.Chinnaswamy Stadium, Bengaluru. Wembley Stadium. Many FIFA World Cup stadia. DLF Golf.

Value proposition:

- 1/2 the cost and 1/4th the time of a conventional concrete stadium.
- Superior Design: An interlocking system without nuts & bolts, ensuring safety over decades of usage.
- Earthquake resistant and calculated structural design, conforming to EN standards.
- High Durability: made with galvanized steel, designed to last for decades.

Credentials: SOCOTEC, EN, NBC

TURF PROTECTION SYSTEM

Terraplas is designed to protect the surface at stadiums when the playing area is being used for non-sporting events. Terraplas is designed to allow safe conduct of revenue generating events like opening and closing ceremonies, music concerts, political gatherings, trade shows, weddings, etc.

Prominent installations:

Transstadia, Ahmedabad. Jawaharlal Nehru Stadium, Shillong. Wembley Stadium. ANZ Stadium. Emirates Stadium. Dubai Sports City. Ohio State University.

Hybrid Turf is the perfect blend of both synthetic fibres and natural grass. This provides the best of both systems as the synthetic fibres provide the resilience & strength, while the sport is played on the natural grass surface.

Most of the elite stadiums and academies in the world as well as all the stadiums of the last many World Cups have hybrid turf. It comes in either a turf panel system (PlayMaster) or an injection system (GrassMaster).

HYBRID TURF

Prominent installations:

FC Madras, India. Wembley, UK. Tottenham, UK. Camp Nou, Juventus Centre and Stadium, Old Trafford, Anfield Stadium, over 16 Premier League Stadiums, 14 EFL Stadiums, 5 National grounds.

INDOOR SPORTS FLOORING

Maple Wood: Various options ranging from Maple Hardwood (incl MFMA) or Teak.

Cushioned PVC: Various options with different cushion layer and PVC wear layer

Polyurethane (PU): Cast-in-situ PU Sports flooring on a shock-pad

Interlocking Modular Sports Tiles: HDP tiles

Prominent installations:

Woxsen University, Hyderabad Golf Club, IIM Indore, Sainik School etc.

Credentials:

FIBA, BWF, IHF, FIVB and other global standards

Acrylic system is suitable for sports needing firm surfaces (Basketball, Tennis, Pickleball etc). It comes in 5-8 layers including cushioned layers and laid on bituminous asphalt or concrete surfaces.

Acrylic coating are the least expensive and widely used surfaces and popular for most outdoor courts.

Prominent installations:

JNTU Hyderabad. Sainik School, Sambalpur. Shipwright Naval School, Vizag. INS Garuda, Kochi. Greenwood High, Bangalore. KREA University. Woxsen University. Vista International School etc.,.

ACRYLIC & PU COURTS

PRE ENGINEERED BUILDING

PEB structures made of steel with concrete foundations provide a pillar-free play area and are ideal for Indoor stadiums of various sizes. They are cost-effective, quick to construct and long lasting.

Prominent installations:

Indian Institute of Management, Indore. Govt. Degree college, Woxsen University,

**INTERLOCKING
MODULAR
SPORTS
FLOORING**

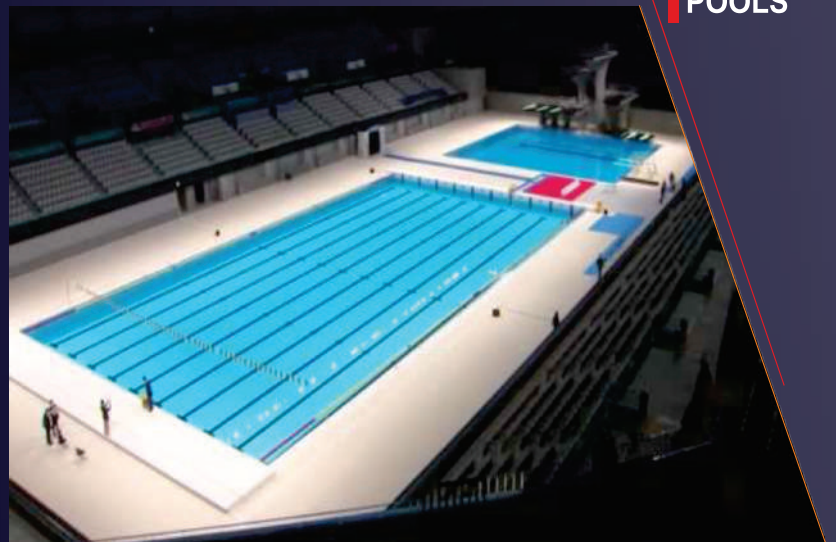

SnapSports modular sports flooring is ideal for all Indoor and Outdoor sports...and also for non-sports usage. Made of HDPE, the SnapSports tiles meets FIBA, ITF standards and comes with 16 years Warranty.
